Summary

Experienced Frontend Developer with over 4 years of expertise in building scalable, user-friendly web applications. Proficient in modern JavaScript frameworks like React and Next.js, with extensive experience in TypeScript and state management libraries (Redux, MobX). Passionate about clean, maintainable code and delivering impactful solutions. Currently based in Lisbon, Portugal, and open to remote opportunities.

Experience

Transneft Technologies

September 2024 - present

Project: Screen Form Editor

Stack: Nx, React, MobX, Konva, Quill

- Developed an internal UI-based interface for Kafka service management in just 3 weeks, meeting tight deadlines and delivering a fully functional MVP.
- Implemented core UI logic using the company's custom UI Kit, ensuring consistency and reusability across components.
- Currently building a complex reference data management system with strict delivery timelines, focusing on structured architecture and clean state management with MobX.
- Enhanced team velocity through close collaboration with backend engineers and tight coordination across product and QA.
- Continuously maintained scalable and modular codebase, following best practices in code quality and UI consistency.

AMMC group

September 2023 - August 2024

 <https://www.amm-c.ru/>

Project 1: Nizhny Novgorod Region Resident Card (nn-card.ru)

Stack: Next.js (11), TypeScript, Ant Design, Redux Saga, SCSS, Axios, SWR, GitLab, Figma

- Designed a dynamic multi-step application form with flexible validation and Gosuslugi integration.
- Implemented real-time notifications via WebSockets, improving response times for status updates.
- Enhanced admin panel with advanced search and statistical tools, increasing operational efficiency by 25%.
- Reduced bundle size by 40% through strategic codebase optimization.
- Mentored two junior developers, accelerating their onboarding process by 50%.

Project 2: BW Marketplace

Stack: Next.js (13), TypeScript, Material-UI, SCSS, Redux, Jest, React Testing Library, Socket.IO

- Built a marketplace platform from scratch, featuring product catalogs, dynamic filtering, and user profiles.
- Customized Material-UI components to align with branding requirements and improve user experience.
- Boosted test coverage from 0% to 70%, leading to a 20% reduction in production bugs.

Bars group

January 2023 - August 2023

 <https://bars.group/>

Project: Budget Process Optimization for the Ministry of Finance

Stack: Next.js (12), TypeScript, Ant Design, SCSS, GraphQL, Jira, GitLab

- Developed highly interactive editable tables using Ant Design, enhancing user input efficiency.
- Refactored legacy code, reducing technical debt by 30%.

- Advocated for task breakdowns and smaller pull requests, cutting review times by 20%.

Orion Innovation

March 2021 - January 2023

 <https://www.orioninc.com/>

Projects: Internal Security System & Natera (US Client)

Stack: React, TypeScript, GraphQL, Apollo, MobX, Jest

Internal Security System:

- Built a real-time monitoring tool using WebSockets, enhancing checkpoint operations.
- Increased test coverage from 0% to 35%, improving system stability.

Natera:

- Designed a unified patient portal, integrating email notifications and tailored video content using Wistia.
- Implemented MFA with email and SMS, increasing user security by 40%.
- Integrated Storybook for reusable React components, streamlining UI consistency across teams.
- Improved test coverage from 40% to 70%, reducing bug discovery time by 25%.
- Optimized GraphQL queries to cut API response times by 15%.

Education

HSE University

2008 - 2012

Science, Technology and Innovation Management and Policy Bachelor
